4

Okay, please enter your phone number below.

Regex

New step +

Customer starts with:

Enter phrases that a customer types or says to start the conversation about a specific topic. These phrases determine the task, problem, or question your customer has.

The more phrases you enter, the better your assistant can recognize what the customer wants.

Enter phrases your customer might use to start this action

Welcome to PLASMA DONOR APP

The Plasma Donor App urges people with type AB blood to consider a plasma donation. AB is the only universal plasma and can be given to patients of any blood type. This means that type AB plasma transfusions can be given immediately, without losing precious time determining if the patient's blood type is compatible. In emergency medicine, such as caring for a major trauma or burn patient, time saved can mean the difference between life and death.

Rules website for being a donor

DO's DON'Ts

DO's

- *Get a full night's sleep.
 - *Have adequate food, including iron-rich foods as they help to maintain the hemoglobin level.
 - *Make sure you're drinking enough water before donating blood.
 - *Make sure you haven't had a cold or flu in at least 72 hours.
 - *Don't smoke for at least two hours prior to donating blood.
 - *Don't consume alcohol a day before blood donation.
 - *Review the most recent qualifying conditions for donors.
 - *Carry your donor identity card or any other form of identification.
 - *Eat well-balanced meals for the next 24 hours to replenish your body.
 - *Wait at least five minutes after the process is completed before getting up.
- Ensure to eat after blood donation. *Let the stomach be not empty.
- *Increase fluid intake for the next 24 to 48 hours as it might take around 24 hours for the body to get the fluids retrieved post blood donation.
