

Project Design Phase-I Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID53969
Project Name	Plasma Donor Application
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- By using a simple website the Donor who wish to give their plasma to the client can able to login to the website and give their details
- The website will collect the details of the Donor , if there any patients need plasma emergency they will get notified through the IBM cloud
- It will create a mutual understand between the social mentality, and it was user-friendly as well
- About the Specification it just need the simple website and cloud storage for storing the Donor details.
