	Jeffery Bension

Step 1:

Go the official Docker website: *https://docs.docker.com/desktop/install/windows-install/*

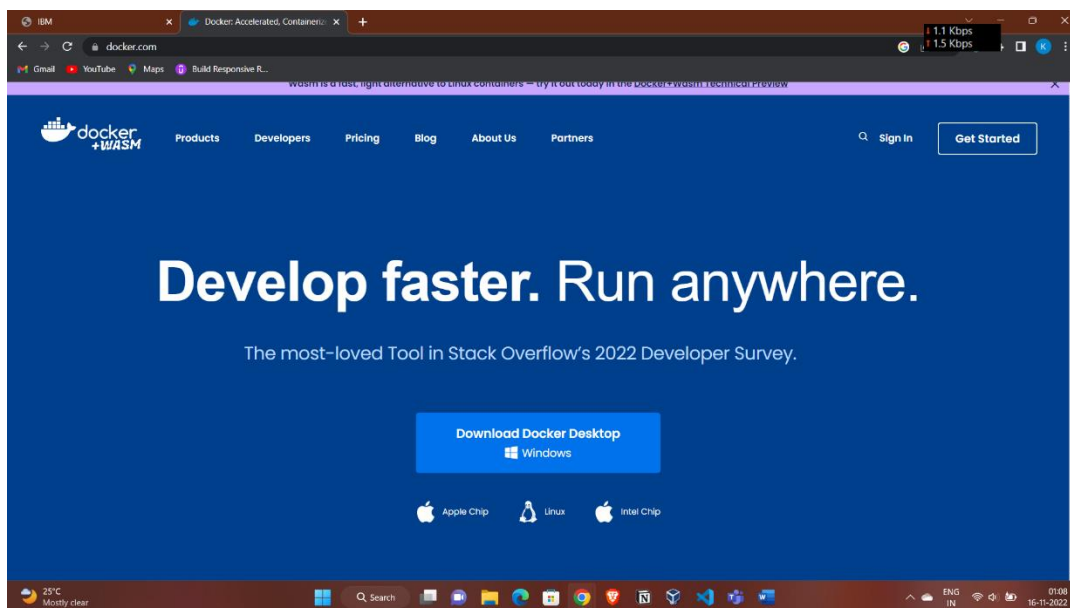

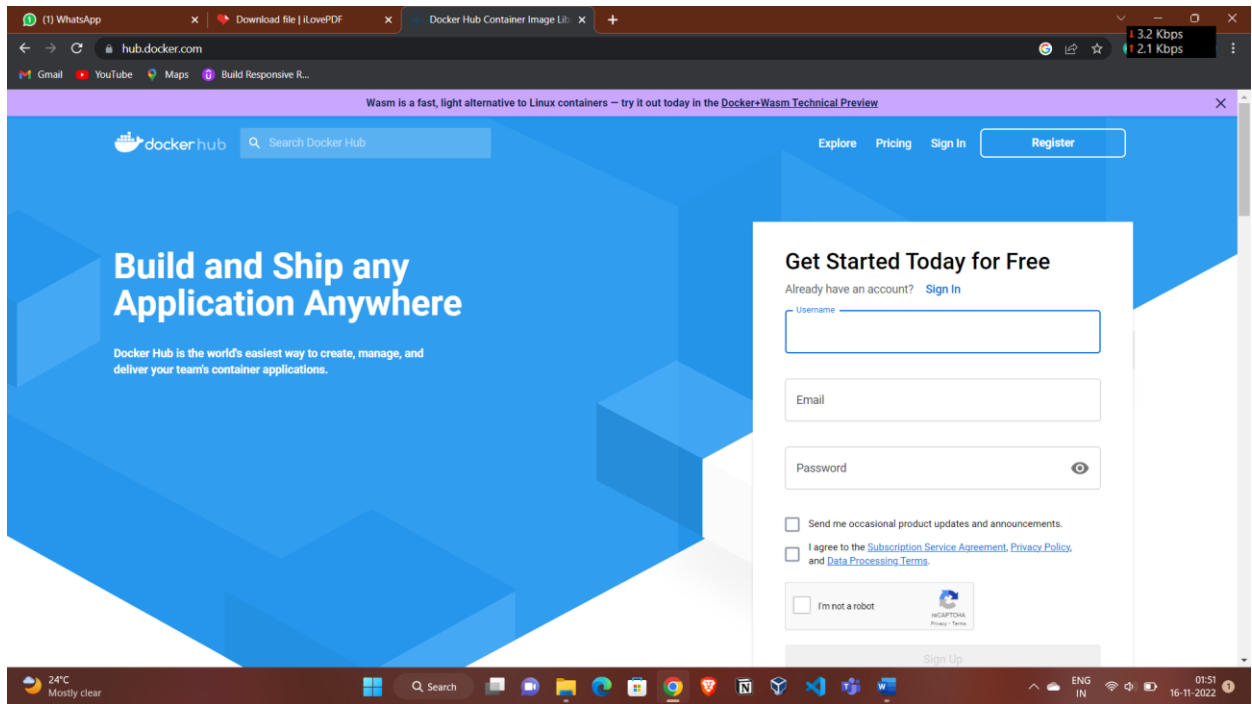

Step 2:

Click that button (Docker Desktop for Windows) and download will start and it takes few minutes to complete.

Step 3:

Goto hub.docker.comregister and create an account and login with the same

Step 3:

Go to downloads in browser (or) type **ctrl + J**, it will navigate to download page and double-click the particular docker file.

Step 4:

Now Installation is complete. This icon was added in your desktop. Double-click the icon to start the docker app, you can register and login that app to access those credentials.

Step 5:

Docker will start correctly, the left bottom side was shown in green color, docker will show the status of docker app working successfully.
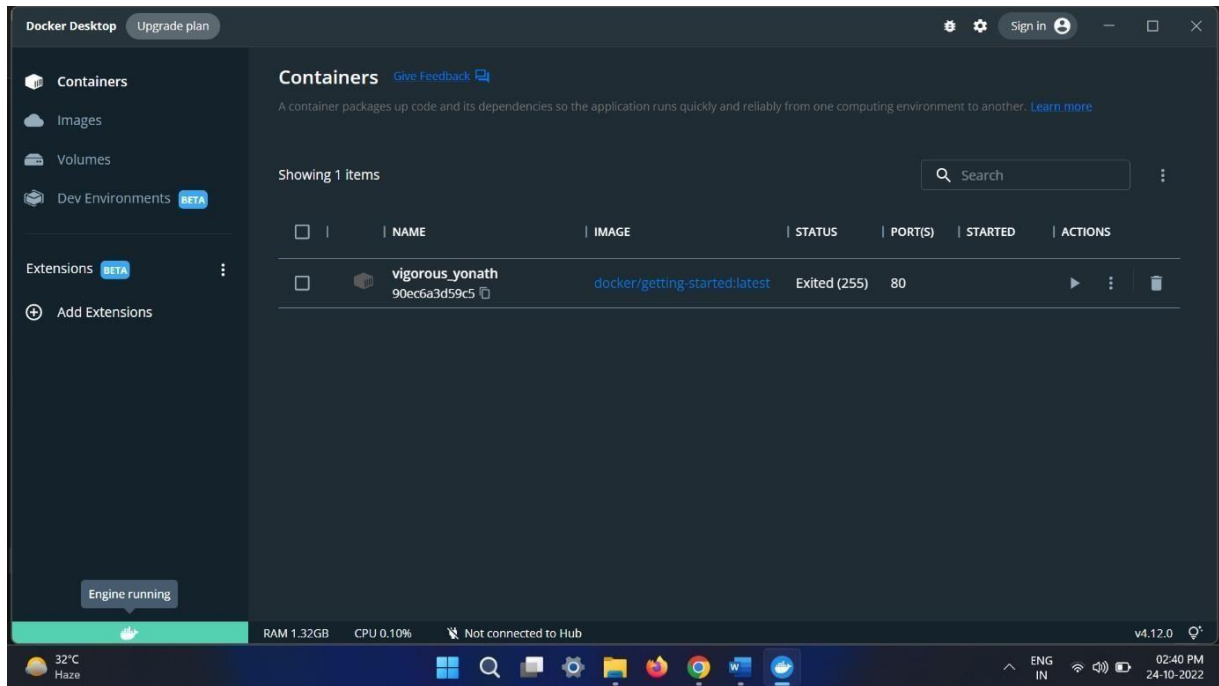

Step 6:

Finally, the docker is installed successfully.
